

Credentials

Nortech provides a full range of proximity, smartcard, magnetic strip and long range RFID credentials.

Nortech offers a programming service for encoding cards, key fobs, vehicle tags and remote control transmitters with customer specific facility codes and sequential identity numbers.

Available credentials include:

ISO Format Magnetic Stripe Cards

PVC cards suitable for printing from industry standard dye sublimation printers. Contains hi-co magnetic stripe.

ISO Format Proximity cards

PVC cards suitable for printing from industry standard dye sublimation printers. A choice of technologies available including Indala, HID (ISOprox®) and *DualProx*TM.

Dual technology (proximity and magnetic stripe) cards are also available.

Clamshell Proximity Cards

Standard white laminated ('clamshell') proximity cards are available for Indala and HID proximity readers. Can accept graphics via industry standard adhesive labels.

Proximity Key Fobs

A variety of proximity key fob designs is available for Indala and HID proximity readers. For *DualProx*TM readers, the key fobs may be custom designed to suit the customer. Standard key fobs are also available.

Dual technology key fobs (RF remote control and proximity) are also available.

Other pre-encoded credentials available from Nortech are Hyper X cards and vehicle tags, RF remote control transmitters and smart cards.

Nortech also provides customised printing for ISO cards and labels for clamshell cards.
